Realism in real-time will require...

1. Some genres rely on realism for their 'suspension of disbelief'.
 - Gamers pay for real-time realism. So aim for games.
2. Better algorithms.
 - Something between PT and MLT. Aim for next 6 years. Be realistic.
3. Better users.
 - Applied science. Combine without the pressure of invention.
 - Rely on game developers.

$$\sigma = 1 / \sqrt{N}$$
